

**Sanyal, Soumya Math 1700 Section 14 SP2011**

1) What are the best things about this class and your instructor?

- Instructor was extremely knowledgeable on the subject matter. He was very enthusiastic, and concerned for student learning the material.
- It's needed for my major.
- The TA was approachable and explained examples well.
- Both the TA and instructor spoke clearly and eloquently. Some of the best math teachers I have encountered!
- Worked out examples and clearly explained confusing topics. Stayed and helped after class.
- Seemed genuine, interested, positive. Available by email at most hours.
- Explained things very clearly. Effectively described everything in detail. Very easy to understand.
- Helped us understand the material very effectively. Knew what he was talking about
- Soumya made it easy to learn and follow his steps. He really knows what he's doing.
- I feel that Soumya did a good job teaching parts that were confusing when the professor tried to explain.
- He taught very well and taught to help the students understand clearly. Did multiple examples each day for better understanding of content.
- The TA is a lot better at explaining and teaching subject matter in comparison to our professor. Great TA!
- The ideas/lessons gone over in class were useful and effective. The instructor covers examples in detail and thoroughly.
- They are open to answering any questions we have during class and usually explain it pretty well.
- The clarity with which he displays information and the depth that he goes to to complete problems effectively.
- He would email us extra solutions and helpful guides if he ran out of time in class
- Soumya was a great instructor. He spoke clearly and was willing to answer any question I had.
- Instructor was always willing to spend extra time helping students. Took time out of his own schedule to email extra problems and to work with students

2) What things need improvement? Any suggestions?

- Easier please
- More example problems for exams.
- I suggest Amanda Clayton to drop the online homework because it doesn't help, it's annoying and tedious.
- Less online homework.
- No he did a great job
- Online homework is a dumb idea. Math = paper + pencil NOT online!
- Soumya did great. Get rid of Webassign
- Change TA to MWF
- The amount of different questions gone over should be better timed out, to provide for answers to more questions.

- The homework is pretty ridiculous. No one likes it. It needs to go. It's too hard, the computer is too picky when it comes to answers. And I paid \$25 for it! What is that???
- He was rather slow at uploading grades (I believe he thought some would go up automatically). Also he originally never had a plan for what to do with us if no one had an exact question.
- Sometimes the lecture instructure and Soumya would approach things differently. This could be slightly confusing.
- None. Course was very well

3) Other comments?

- I love Math!
- Recitation was just as helpful as lecture. I was never disappointed or left wondering.
- Soumya is the man. Great TA. Should be a professor.
- He was fantastic!
- Very well done and I got more help from these discussions on Tuesday and Thursday because we did more problems.
