

Sanyal, Soumya Math 1500 Section F FS2010

- 1) What are the best things about this class and your instructor?
 - He made sure that any and all questions were answered to the best of his ability. He also gave plenty of time for quiz completion.
 - Soumya is very thorough and clear, he makes the information easy to understand.
 - His knowledge of the material is very good.
 - Very easy to understand in explanation
 - Asks questions
 - He was a nice guy and made things easy to understand.
 - He knows what he is doing & he tries hard.
 - It's only twice a week
 - He answers the questions clearly.
 - He really stops to make sure EVERYONE understands. That's a very big help.
 - Good communication with students. Always asks for questions of our limitations before pushing us further.
 - We were able to do problems that we had over the homework.
 - He chose to answer any questions we had before moving on to other examples.
 - He goes through each step clearly. Goes by student questions. Articulate. Informative.
 - He is very understanding.
 - I have already graduated from Mizzou and have had many TAs. Soumya is probably the best TA that I have ever had.
 - Awesome, great teacher
 - Was very helpful and took his time to explain the problem. He always asked if we understood what he had just done.
 - Great teacher. Taught material well.
 - Being able to ask questions freely.
 - He is very thorough and good at simplifying things
- 2) What things need improvement? Any suggestions?
 - Maybe write a little smaller to conserve board space.
 - Sometimes he just takes too much time on a single problem, spelling out every step like we barely know math.
 - Homework grades, between quizzes and tests there is "0" points to help out overall scores.
 - Answers to even HW problems available somewhere.
 - Slow down
 - Do more examples! Speak louder! More extra credit opportunities!
 - Better detail explanations.
 - Sometimes he doesn't solve the problems the same way it is solved in lecture so it can get confusing. He also sometimes goes into too great of detail when solving problems it isn't always necessary.
 - I don't think he could do much better.
 - Focus more on the task at hand. Today we spent the entire class on Riemann Sums which won't even be on the exam. I would appreciate more test-prep work instead.

- Some of the questions that we do in class weren't on the test so I feel that if we spent more time on test questions I would be more prepared.
 - Improve English.
 - None that I can think of.
 - None
 - More prepared questions to show in class.
- 3) Other comments?
- Thank you for being so helpful and concerned with learning.
 - Soumya is really great! I feel lucky to have him for a TA!
 - Very intelligent
 - None
 - No
 - ☺
 - RSD is very helpful based on how big lecture is.
 - Best teacher I've had in college
