What are the best things about this class and your instructor?

N/A

What things need improvement? Any suggestions?

He needs to go a lot faster. Stop with all the  
length definitions that are more difficult to understand  
than the actual concept. All the writing is extremely  
unnecessary. Boring. He does too much.

What are the best things about this class and your instructor?

The class is small enough and instructor is willing enough to go over problems again if we aren't fully understanding it.

- Test preparation. A study guide or review during class would be beneficial,
- Taking a little time to go over Webwork assignments.

What are the best things about this class and your instructor?

The best thing about the instructor is he genuinely cares about our learning. I'm not sure there is a best thing about the course.

What things need improvement? Any suggestions?

I think the instructor could spend more time explaining his examples.

Other comments?

I think the online homework system is rather difficult to use at times when compared to, say the My Math Lab System used for Math 110.
